announces Public Workshop on

## “ISTQB Agile Tester Certification”

1<sup>st</sup> – 2<sup>nd</sup> October, 2017 @ Bengaluru

### Objectives of the training program

Agile testing is a relatively new approach to software testing that follows the principles of agile software development as outlined in the Agile Manifesto.

A tester on an Agile project will work differently than one working on a traditional project. Testers must understand the values and principles that underpin Agile projects, and how testers are an integral part of a whole-team approach together with developers and business representatives.

There is a lot of confusion concerning agile testing. The Agile Extension will give the tester the knowledge to be part of agile testing teams and achieve high performance.

### Target Audience

- The participant must be familiar with software testing life cycle [STLC].
- Experience of 1-2 years in any life cycle model would be added advantage.

### Course Contents

#### Section A : Agile Software Development

- Fundamentals of Agile Software Development
- Aspects of Agile approaches

#### Section B : Fundamentals of agile testing principles, practices and processes

- Difference between testing in traditional and agile approaches
- Status of testing in agile projects
- Role and skills of a Tester in an agile team

#### Section C: Agile Testing methods, Techniques and Tools

- Assessing quality risks and estimating test effort
- Techniques in agile projects
- Special emphasis on application of exploratory testing principles and pair-wise testing technique
- Tools in agile projects

**Faculty Profile**

Faculty has twenty years of experience in the I.T. industry spanning across development, testing, training and consulting. He has trained over 3000 senior testing professionals and 4000 campus minds on requirements and software testing related areas in many leading companies in the last twelve years of his training and consulting career.

He has conducted more than 500 workshops in his career on the above said topics and for laterals and campus minds with consistent encouraging feedback in both classroom and online modes.

He is a certified on ISTQB Agile Tester Extension Certification.

**Testimonials**

It was a fantastic session. we got different approaches of test estimation for different types of testing project. As the session was interactive it made every participant to clear doubts/mindsets while looking from different aspects of test estimation. Case studies was the most impressive part of the session. - **Bhushan Wathare – Atos Origin, Pune**

Nice Presentations!!! Very Clear voice and excellent pace. - **Shirish Gupta, Wipro Technologies**

Instructor had in depth knowledge of the subject. It was easy to understand the concepts. - **Irfan Patarekar, Capita, Pune**

**Hurry up!!! Register today!!!**
